CONDITIONS

The contractor/applicant shall make the tap, with the Highway Superintendent's permission and inspection. The cost of these services shall be borne by the contractor/applicant. The contractor/applicant shall be responsible for the installation of the hook-up from the sewer main to the dwelling. An excavation permit is needed for any excavation in the street that is needed to hook-up to the sewer main. After any excavation in the street, the road shall be restored to it's previous condition and all ditches are to be fully compacted with twelve inches (12") of gravel and covered with three inches (3") of bituminous concrete. The contractor/ applicant shall be a hundred percent (100%) responsible for the surface of the street excavated until all signs of the trenches shall have been eliminated.
